\*Varieties marked (\*) grown in limited quantities will be prorated.

Landscape size hybrid rhododendron are also available in B & B sizes up to 4', although not every variety in every size. These plants are listed in our catalogue of general nursery stock.

## TERMS

Prices, net, f.o.b. nursery.

Deposit required on all orders.

1/3 down payment required on C.O.D. orders.

Payment in full with order—free packing.

Shipping at cost and risk of purchaser.

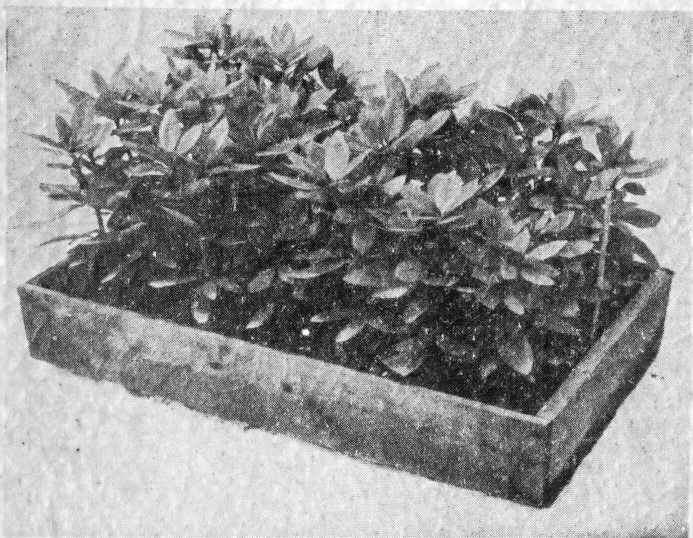

Minimum order—50 plants.

Orders accepted subject to prior sale and crop yield.

Order Early—prior to November 1 for following Spring, to assure best selection of varieties.

All plants listed are cutting grown. They are transplanted from rooting media into 4" deep flats and make one growth in a greenhouse. Plants are hardened off and cut out with a peat ball in May; individually wrapped in heavy wax paper and packed in specially made lightweight cartons for pickup or shipment. Minimum of 50 plants per carton.

With their strong fibre root system our cutting grown rhododendrons will definitely make a heavier salable size plant in less time without the weakness of union, suckering of understock and phytophthora (wilt) disease so common in grafted rhododendron.

Four inch deep flat of own-root hybrid rhododendron transplants, ready to go. Plants are cut out with a peat ball, wrapped in waxed paper and packed for pickup or shipment. See front cover picture of own-root hybrid rhododendron transplants in greenhouse.
